80 COMMERCIAL DISHERS

● **Microban® Antimicrobial Protection...**
Microban® antimicrobial protection is built into the handle to keep it cleaner between washings. Microban protection inhibits the growth of bacteria, mold, and fungus that can cause stains and odors. For the life of the disher, it will provide continuous protection against microorganisms. Normal cleaning practices should be maintained. Does not protect users against food borne illness.

● **Pan Rest™ Feature...**
The end of each handle is notched to let users rest the disher on the food pan without worrying about slippage.

● **Ergonomic Grip...**
Shaped for a comfortable grip, each handle is designed to reduce hand and arm fatigue.

● **Color-Coded Handles...**
Bright identifiable colors help maintain portion control and make disher size selection easy.

● **Imprinted Capacity...**
With the capacity clearly molded into the handle, there's no question which size is being used. Nine sizes (6, 8, 10, 12, 16, 20, 24, 30, 40) provide exact portion control.

● **Stainless Steel Components...**
Created for extended durability and long life, each component is made of the highest quality stainless steel to resist corrosion. Dishwasher Safe...
Designed for easy cleanup in the dishwasher.
